Who it's for

Ideal for those beginning or advancing in IT, this apprenticeship suits aspiring IT Support Analysts and Network Technicians eager to leverage technology for organisational success and improved business operations.

What will the learner gain?

- Information Communications Technician Level 3 Apprenticeship
- GenBizAI generative AI certification
- Optional Azure Fundamentals
- Optional AWS Cloud Practitioner
- Optional CompTIA A+
- Optional Cisco IT Essentials
- Optional Microsoft Office Specialist Certifications including PowerPoint, Word and Excel

About this standard

In the digital-first world, Information Communications Technicians are crucial for keeping businesses connected. The apprenticeship equips staff with the skills to manage digital infrastructures, ensuring smooth operation.

Apprentices will master installing, maintaining, and supporting communication networks, learning key aspects like network configuration, cloud services, and troubleshooting.

This program blends hands-on experience with theoretical knowledge, preparing your employees to enhance your organization's digital presence and reliability effectively. It's an essential investment in developing the technical prowess your business needs to thrive in the digital era.

Why Kaplan?

Highly rated

Rated as a top 50 apprenticeship provider by Rate My Apprenticeship.

Industry partnerships

Partnering with industry leaders, our apprenticeships are underpinned by specialist content.

Expert tutors

All of our tutors are subject matter experts, with real world experience in their industry.

Small group learning

All students learn in small cohort groups with like-minded peers to ensure plenty of interaction and support.

Hands-On learning

All our virtual classes are engaging, focussed on hands-on and immersive skills using innovative labs to support skill building.
